Web Announcement 1758

Modernization: Attention Providers Enrolled with Atypical Provider Identifiers (APIs)

Reminder to [Web Announcement 1712](#): The Division of Health Care Financing and Policy (DHCFP) will implement a new, modernized Medicaid Management Information System (MMIS) on February 1, 2019. In December 2018, the DHCFP will hold a Public Hearing to present a proposed requirement for all new initial provider enrollment applications and any revalidations to be submitted with a National Provider Identifier (NPI).

If the DHCFP moves forward with this proposal, when the modernization of the MMIS is implemented, the Atypical Provider Identifier (API) will no longer be accepted by Nevada Medicaid. All providers currently enrolled with an API will need to obtain an NPI. Any new provider not currently enrolled with Nevada Medicaid will be required to obtain an NPI to enroll.

Please note:

- If any initial enrollment or revalidation is received on or after February 1, 2019, using an API, the application would be rejected by Nevada Medicaid.
- If a provider is currently enrolled using an NPI, there are no changes necessary.
- If a provider is currently enrolled with Nevada Medicaid with an API, there will be no changes necessary at this time. Please note that at the time of revalidation, a valid NPI will need to be used on the revalidation documentation as the API will no longer be accepted at the time of revalidation.
- If a provider does not have an NPI, the provider can navigate to the link listed below to create their account and obtain an NPI: <https://nppes.cms.hhs.gov>

Please continue to review future web announcements for updates and reminders, and if there are any questions, please contact the Nevada Medicaid Customer Service Center at (877) 638-3472.
